

Laser 4.7 2008 regatta registration procedure

Club junior programs that wish to enter Laser 4.7 sailors into a JSA regatta

- In the JSA waiver database, the sailors in question should be identified as sailing Laser Radials. The JSA sail # should be entered as normal but the regular sail # should be prefixed with the phrase "Laser 4.7". For example, if Suzy Sailor is sailing a Laser 4.7, her entry in the database should show her as sailing a Laser Radial, her JSA sail # should be her JSA sail #, and her sail # (which might be something like 177506) should read "Laser 4.7 177506).
- When preparing a regatta entry, check the NOR to see if the regatta accepts Laser 4.7s. If so, include the Laser 4.7 sailors in the Radial entry.
- Download the Radial entry spreadsheet and make a copy of it, changing the name of the copy to identify it as being for Laser 4.7s. Edit the Radial entry spreadsheet to delete all the Laser 4.7 entries and then edit the Laser 4.7 entry spreadsheet to delete all the Radial entries.
- If the host club has specified that it receives entries by emailing, include the Laser 4.7 spreadsheet in the files that you email. If the host club has specified that it will download entries, send an email to the regatta chair with the Laser 4.7 spreadsheet attached, advising the regatta chair that you are entering 4.7s.

Regatta hosts that will accept Laser 4.7s into their regatta

- If you have specified in your regatta setup that you want clubs to email files to you, you will receive a separate spreadsheet for 4.7s from any club that is entering 4.7s.
- If you have specified that you will download the files, the Laser 4.7 entries will be included in the Laser Radial spreadsheet. They will be identified by the phrase "Laser 4.7" in the regular sail # field (e.g., "Laser 4.7 177506). Make a copy of the Radial entry spreadsheet, changing the name of the copy to identify it as being for Laser 4.7s. Edit the Radial entry spreadsheet to delete all the Laser 4.7 entries and then edit the Laser 4.7 entry spreadsheet to delete all the Radial entries.
